EDUCATION

University of California, San Diego

Bachelor of Science in Data Science – 3.91 GPA

Activities: Data Science Student Society, TritonNeurotech, Chinese American Student Assoc., Tau Kappa Epsilon

La Jolla, CA

Expected 2028

EXPERIENCE

MeshyAI — Data Science Intern

Apr. 2026 – Present

The global leader in AI-powered 3D asset generation (meshy.ai)

Sunnyvale, CA

- Launched Meshy's **first recommendation feed** for **12M users**, designing and shipping the end-to-end stack.
- Drove **54%** more recommended-content likes and **21%** more clicks through **10+ product experiments**.
- Enabled **2x growth in community weekly active users** by building the real-time data layer powering new features.
- Guided advertising strategy by identifying **high-converting user segments** through behavioral conversion analysis.

Meta-Skills — Software Engineering Intern

Jun. 2025 – Aug. 2025

AI-powered avatar multilingual e-learning platform (meta-skills.io)

Berlin, Germany

- Built **SvelteKit/Express.js** tool automating AI-avatar multilingual e-learning video generation for clients.
- Cut manual content creation from **hours to minutes** with **100%** success rate across production runs.
- Benchmarked open-source **LLMs**, delivering data-driven recommendation to migrate from paid API providers.

UC San Diego — Data Science Instructional Assistant

Sep. 2025 – Present

HDSI tutor for Principles of Data Science (datascience.ucsd.edu)

La Jolla, CA

- Led** 50-minute pods of 30 students, reinforcing DSC 10 (Principles of Data Science) lecture concepts.
- Hosted weekly office hours and exam review sessions, supporting **500+** students across the course.
- Developed and validated worksheets, lesson plans, and exam questions for accuracy before release.

Economics Lab, UC San Diego — Research Assistant

Mar. 2025 – Jun. 2025

Assisting research in higher-education spillover research in Africa

La Jolla, CA

- Built geolocated dataset of **190+** East African education institutions using **Pandas + BeautifulSoup**.
- Computed regional diversity metrics analyzing higher-education spillover effects on student outcomes.

PROJECTS

TritonPlanner (co-founder) | tritonplanner.com

Jan. 2025 – Jul. 2025

AI-powered academic planner for UCSD — smart scheduling and RAG course search

- Web-scraped **7,000+** UCSD courses via **Selenium**, structuring raw data into a queryable course catalog.
- Engineered modular **Node.js** backend handling user queries and API integration, deployed on **Render**.
- Built **RAG** course assistant with **OpenAI + Pinecone** vector DB for hybrid semantic + keyword search.
- Designed **React/Next.js** planner UI consolidating UCSD's online academic planning resources in one tool.

ChatSight (Researcher) | dstl.ucsd.edu

Dec. 2025 – Present

AI tutor analytics platform for DS/CS courses at UCSD — Prof. Sam Lau

- Built instructor dashboard reviewing AI tutor chats, tracking sentiment and question patterns for **500+** students.
- Created labeling workflows categorizing student-AI conversations to extract learning and struggle signals.
- Implemented **SQL-backed pipeline** with **TypeScript/React** interface to query and visualize tutor usage data.

iHARP Anomaly Prediction Hackathon (Finalist)

Jan. 2025

nsfhdr.org/html/mlchallenge.html

- Processed **20 years** of sea-level data, generating city-centered 2D grid subsets as **CNN** input.
- Designed and cross-validated a **CNN** classifier for coastal anomaly prediction.
- Improved accuracy via pooling techniques and weighted prediction adjustments.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript/TypeScript, Go, Java, HTML/CSS

Data/ML: Pandas, NumPy, scikit-learn, XGBoost, LightGBM, Machine Learning, NLP, Sentiment Analysis, Named Entity Recognition, Feature Engineering, A/B Testing, Hypothesis Testing, Regression, Confidence Intervals, PyTorch, TensorFlow, Hugging Face, spaCy, MLflow, Seaborn, Deep Learning

Databases/Cloud: GCP, BigQuery, Vertex AI, AWS, Databricks, PostgreSQL, Neo4j, Redis/Valkey, Pinecone, Docker, Kubernetes, REST APIs

Data Engineering: Kafka, dbt, Apache Spark, Apache Airflow, Delta Lake, CDC, Flink, Airbyte, Medallion Architecture

Dev Tools: Jupyter, OpenAI API, Prompt Engineering, Claude Code, Tableau, Looker, Matplotlib, Hex, PostHog, StatSIG, Git, VS Code, IntelliJ

Frameworks: LangChain, FastAPI, React, Node.js, Next.js, Express.js, SvelteKit
